## INGREDIENTS

Water (7732-18-5); Sodium Hydroxide (1310-73-2); Butoxyethanol (111-76-2); Ethanolamine (141-43-5); Sodium Orthosilicate (1344-09-8)

## DIRECTIONS

Recommended for removing water-based acrylic finishes from all types of resilient tile and hard surfaces. Pre-test in a small area; color bleeding or discoloration may occur on linoleum, rubber tile, or asphalt tile. Not recommended for stripping linoleum or sheet vinyl floors. Sweep or dust mop floor to remove any large debris. Dilute with hot water. For normal stripping dilute 13 oz. /gal. or 100 mL/L (1:10) of water. For heavy stripping dilute 25 oz. / gal. or 200 mL/L (1:5) of water. Apply solution liberally to floor surface. Allow a minimum of 5 minutes contact time. Be sure to keep surface wet at all times. Agitate with a low speed rotary machine, automatic scrubber or stripping machine. Pick up solution with a wet vacuum, automatic scrubber or mop and bucket and thoroughly rinse the floor. Allow floor to dry completely before applying finish or sealer. Please recycle empty container.

\*This is typical coverage for these products. Actual coverage depends on the porosity and other characteristics of the surface being stripped.
