DIRECTIONS

Use 1 oz of product per 4 gallons of warm or hot water for light soils. Allowing pots and pans to soak for a few minutes simplifies the job even more. Wash in solution of warm water between 60° – 130°. Rinse and allow drying before reuse.

Concentration varies according to water hardness and environmental conditions. Consult your chemical technician for proper dilution, application and use prior to using for the first time. NOTE: All equipment or surfaces subject to direct contact with food should be thoroughly rinsed with potable water following use. Avoid contamination of food in the application and storage of this product.
